

SCHILLER

INTERNATIONAL UNIVERSITY

Bachelor of Arts in International Economics

“Studying at Schiller International University, Heidelberg has opened doors for students like me by giving us essential skills and providing a strategic position to enter the European business world quickly and easily, since it offers its program in English and is located at the center of Europe’s economy.

Schiller International University’s degree in International Economics provides a thorough training in economic theory and policy. The impact of economics is examined at many levels. Students learn how economics affect the individual and the company and the effect of economic policy at national and international levels. The degree program stresses the importance of international economic relations and of maintaining a comparative international perspective.

This degree includes courses in international business administration, international relations and political science. Students graduating with this degree go on to careers focusing on economic and political analysis in areas of government, business, finance, international relations or law.

Schiller has given me the opportunity to learn about different cultures and it has also given me the foundation to improve my knowledge of global economics, international relations, and international business.

In addition, I love being a Schiller student because Schiller is structured in such a personal and close-knit way that both students and faculty feel as if we are one family”.
